365 business API

365 business API is an ever-expanding set of cloud computing services to help your organization meet its business challenges.

With 365 business API, your business or organization has the possibility to use standardized techniques and processes to solve your business requirements without developing own solutions.

WHY 365 BUSINESS API

BE FUTURE-READY

Do not rely on individual solutions that may not be compatible with future movements or systems. Take a step forward and connect to a modern, cloud-based platform that supports different types of business applications and delivers powerful, resilient services on a modern, state-of-the-art architecture.

USE WHAT YOUR BUSINESS IS REQUESTING FOR

You have the choice. With 365 business API, you have several services at your disposal. You decide which one fits your business needs, and you only pay for what you use.

With a regular pay-as-you-go subscription to 365 business API, you are entitled to use every service offered by 365 business API. If you are facing a new business challenge, use other services or simply request a new service.

OPERATE HYBRID SEAMLESSLY

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate your present systems seamlessly and without additional need for resources, environments or infrastructure.

We're relaying on common protocols and techniques to allow you to integrate your business solution as easy as possible.

DATA SECURITY

Get security from the ground up. We know business data are sensitive and so we're relay on secure protocols and do not persistently storing any of your data in our systems or services.

All data are just processed in-memory and no persistent data storage is used. The 365 business API is exclusively communicating by encrypted HTTPS connections (transport encryption).

365 business API
